## Available VFC Vaccine – November 2011

The following table lists short-dated VFC vaccine that is available across the state. If you are a current VFC provider and can use this vaccine before it expires, use the contact information in the table to arrange a vaccine transfer. This table is updated weekly. The vaccine listed below was available at the time of posting, but there is no guarantee that it is still available. Please follow the guidelines below when transferring vaccine:

- VFC vaccine can only be transferred between currently enrolled VFC providers.
- Follow the Montana Immunization Program Vaccine Management Plan (pg. 18) when packing vaccine for transfer.
- Limit transfers to those that can be personally carried and where the vaccine can reach an approved storage unit within 4 hours. Commercial carriers may be used in emergencies. Contact the Immunization Program if you have an emergency.
- Do not transfer opened multi-dose vials.
- Please notify the Montana Immunization Program when vaccine has been transferred so we can remove it from our list.
- Account for transferred vaccine on your Monthly Vaccine Report to Home IV Pharmacy.
- To add short-dated vaccine to this list, contact the Montana Immunization Program: ([hhsiz@mt.gov](mailto:hhsiz@mt.gov) or 444-5580) preferably three months before the expiration date.
- Do not transfer short-dated vaccine to providers without first contacting them to see if they can use it before it expires.
